## JS (Part 7)

## **Practice Questions**

- Qs1. Write an arrow function named arrayAverage that accepts an array of numbers and returns the average of those numbers.
- Qs2. Write an arrow function named isEven() that takes a single number as argument and returns if it is even or not.
- Qs3. What is the output of the following code:

```
const object = {
message: 'Hello, World!',
logMessage() {
console.log(this.message);
}
};
setTimeout(object.logMessage, 1000);
```

Qs4. What is the output of the following code:

```
let length = 4;
function callback() {
  console.log(this.length);
}
const object = {
  length: 5,
  method(callback) {
  callback();
},
};
object.method(callback, 1, 2);
```
